Professional Summary

Motivated Computer Science student at Cairo University with a strong foundation in C++ problem solving and a growing focus on .NET development. Currently learning C#, delegates, and Windows Forms, while building a DVLD desktop application. Seeking an internship or junior opportunity to apply software-development fundamentals, learn from an engineering team, and contribute to practical .NET applications.

Education

B.Sc. in Computer Science and Information - Cairo University

Third-year student | Overall grade: Very Good

Technical Skills

Programming Languages	C++, C#
.NET Development	.NET fundamentals, C# delegates, Windows Forms
Problem Solving	C++ problem-solving practice and algorithmic thinking
Tools	Git, GitHub

Projects

DVLD - Driving and Vehicle License Department System

Desktop application in progress using C# and Windows Forms. Applying object-oriented programming and .NET concepts while building a practical management-system project. Source code: github.com/AdhamSaber2357

Learning and Development

.NET Development Track

Actively studying C# and .NET concepts, including delegates and Windows Forms, and applying them in project work.

C++ Problem-Solving Practice

Developed programming fundamentals through solving problems in C++, strengthening logic, debugging, and algorithmic thinking.
